

Year Five Addition

Year Five	Pupils should be able to:	
Pupils should be taught to:		
<ul style="list-style-type: none"> Add whole numbers with more than 4 digits, including using formal written methods (columnar addition) 		
Compact Columnar Addition		
<p>Children should use the column method when adding tens of thousands and hundreds of thousands. As with previous years, children begin by adding the ones, then the tens etc</p> <p>$142365 + 39243 = 181608$</p> 	<p>Children need to start using the column method to add more than two values</p> <p>$48216 + 37452 + 11367 = 97035$</p> 	
Columnar Addition with Decimals		
<p>Zero (0) should be used as a place holder to ensure that the numbers are to the same decimal place</p> <p>Zero is added to show there is no value to add</p>	<p>It is important that children recognise that they are adding tenths and hundredths and that they understand they are adding part of a number not a whole number</p>	

$$23.3 + 16.48 = 39.78$$

	2	3	.	3	0	← Add the place holder
+	1	6	.	4	8	
<hr/>						
	3	9	.	7	8	
<hr/>						

$$19.01 + 3.65 + 0.7 = 23.36$$

	1	9	.	0	1	
+		3	.	6	5	
		0	.	7	0	← Add the place holder
<hr/>						
	2	3	.	3	6	
	'	'				

Columnar Addition with Decimals

Formal column method is used to solve problems in the context of measure, for examples, weight and money

The decimal point needs to be lined up like all of the other place value columns

$$26.6 \text{ kg} + 14.8 \text{ kg} = 41.4 \text{ kg}$$

2	6	.	6	kg
1	4	.	8	kg
<hr/>				
4	1	.	4	kg
<hr/>				
'	'			

Children use the column method to add more than two values in the context of measures

$$£19.01 + £3.65 + £0.70 = £23.36$$

+	£	1	9	.	0	1
+	£		3	.	6	5
	£		0	.	7	0
<hr/>						
	£	2	3	.	3	6
		'	'			

Subtraction

Year Five	Pupils should be able to: <ul style="list-style-type: none"> Subtract whole numbers with more than 4 digits, including using formal written methods (columnar subtractions) 	
Columnar Subtraction		
<p>Children should use the column method when subtracting tens of thousands and hundreds of thousands. As with previous years, children should use place value counter images and drawings to support subtraction</p>	<p>Using previous imagery with place value counters to support regrouping</p>	
<p>Columnar Subtraction with Decimals</p>	<p>Columnar Subtraction with Decimals</p>	
<p>Zero (0) should be used as a place holder to ensure that the numbers are to the same decimal place Zero is added to show there is no value to subtract</p>	<p>It is important that children recognise that they are subtracting tenths and hundredths and that they understand they are subtracting part of a number not a whole number</p>	
Columnar Subtraction with Decimals in a Range of Contexts		

$$\begin{array}{r}
 45321 \\
 - 23210 \\
 \hline
 22111
 \end{array}$$

$$\begin{array}{r}
 451288 \\
 - 24632 \\
 \hline
 20656
 \end{array}$$

$$\begin{array}{r}
 39.78 \\
 - 23.30 \\
 \hline
 16.48
 \end{array}$$

Add the place holder

$$\begin{array}{r}
 23.136 \\
 - 0.70 \\
 \hline
 22.66
 \end{array}$$

add the place holder

Formal column method is used to solve problems in the context of measure, for examples, weight and money
 The decimal point needs to be lined up like all of the other place value columns

Children should use actual coins to subtract or pictorial resources to support understanding (pictures of amounts of weights)

$$\begin{array}{r} 310.14 \text{ kg} \\ - 26.6 \text{ kg} \\ \hline 283.54 \text{ kg} \end{array}$$

Multiplication

Year Five	Pupils should be able to: <ul style="list-style-type: none"> multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers 	
Short Multiplication		
$77 \times 9 =$ $23 \times 6 =$ TO x O =	$658 \times 8 =$ HTO x O =	$2741 \times 6 =$

Answer:
693

$$77 \times 9 = 693$$

$$\begin{array}{r} 77 \\ \times 9 \\ \hline 693 \end{array}$$

$$658 \times 8 = 5264$$

$$\begin{array}{r} 658 \\ \times 8 \\ \hline 5264 \end{array}$$

Answer: 5264

ThHTO x O=

$$2741 \times 6 = 16446$$

$$\begin{array}{r} 2741 \\ \times 6 \\ \hline 16446 \end{array}$$

Answer: 16446

Expanded Long Multiplication

Expanded long multiplication (two digit numbers multiplied by a teen number)

Expanded long multiplication is the step before long multiplication.

This then leads to long multiplication.
See first example below.

Answer: 299

$$23 \times 13 = 299$$

$$\begin{array}{r} 23 \\ \times 13 \\ \hline 69 \quad (3 \times 3) \\ 30 \quad (3 \times 20) \\ 200 \quad (10 \times 3) \\ \hline 299 \end{array}$$

Long Multiplication

Introduce long multiplication for multiplying a number up to four digits by a two digit number

TO x TO=
24 x 16=

When children are confident with long multiplication extend with three digit numbers multiplied by a two digit number

TO x TO=
23 x 13=

$$\begin{array}{r} 23 \times 13 = 299 \\ \begin{array}{r} 23 \\ \times 13 \\ \hline 69 \\ 230 \\ \hline 299 \end{array} \end{array}$$

Answer: 299

Answer: 384

$$\begin{array}{r} 24 \times 16 = 384 \\ \begin{array}{r} 24 \\ \times 16 \\ \hline 144 \\ 240 \\ \hline 384 \end{array} \end{array}$$

HTO x TO =
124 x 26 =

$$\begin{array}{r} 124 \times 26 = 3224 \\ \begin{array}{r} 124 \\ \times 26 \\ \hline 744 \\ 2480 \\ \hline 3224 \end{array} \end{array}$$

Answer: 3224

Division

Year Five

Pupils should be able to:

- Divide numbers mentally, drawing upon known facts
- Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context
- Divide whole numbers and those involving decimals by 10, 100 and 1,000
- Solve problems involving division, including using their knowledge
- Solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign

Formal Short

Children can do the same when working out remainders

Children should understand short division as grouping. Start by using concrete resources such as place value counters and pictorial methods to solve

$$5648 \div 4 = 1412$$

$$2753 \div 2 = 1376 \text{ r}1$$

$$5648 \div 4 = 1412$$
